TELESCOPING MAST

DOUBLE REINFORCED JOINTS

EXTRUDED ALUMINUM MAST

FEATURES

As the telescoping cranks down, the top portion of the mast rises, allowing you to completely close the umbrella without having to move any furniture placed underneath.

4" diameter aluminum center pole with four internal strength channels, combined with the extruded aluminum ribs provide exceptional support and strength.

For easier installation of an umbrella this large, the mounts to a hinged spigot. This allows for the umbrella mast to be placed onto the spigot while the unit is on its side, prior to raising it to an upright position.

Reinforced grommets paired with an ultra-durable woven nylon wrap prevent the chance of fabric tearing from the frame.

Engineered to withstand 50-60 MPH sustained winds.

Stainless steel hardware throughout.

Please consult a licensed professional for in-ground or surface mounting installations.
